

Greetings To The Honorable
Members Of The Icelandic
Government , And Staff.

I write today , to follow up on our 31 May 2023 correspondence
via email , referencing future medical cannabis legislation.

There are many points of view to consider in the months ahead,
I have enclosed (In The Mail) quick print outs from the internet to encourage
diversity in the analysis of the various paths forward.

I would look for ways to integrate "The Danish Model"
and "The Jerry Brown Marijuana Memo"California.
Non-Profit Approach
Individuals should be allowed to grow at their homes
Excess Product could be sold to local cannabis coop.
It would of course be subject to heavy metal and pesticide testing.
The brand : iceland / arctic / pure , should be REAL ,
opening the door to exports to consuming nations.
Many positive thoughts and opinions.
Enjoy the enclosed (in the mail) reading materials.
Peace Always
Georg Bjarni Bernard
