Subject: ban on male circumcision

Dear Iceland

My wife and I have visited your beautiful country 3 times and hope to go back again. However we cannot in good conscience do so if you follow through on the proposed legislation to ban male circumcision. This is blatantly discriminatory against both Jews, like us, as well as Muslims, to whom this is an essential part of our religion. As a doctor I know that there is no health reason to ban male circumcision. In fact, it has proven health benefits in terms of preventing infections, including HIV, and even cancer of the penis.

So please don't follow through with this anti-Semitic and anti-Muslim legislation so that we can return once again to your beautiful country

Jack Micay MD
Toronto, Canada
