To whom it may concern,

I want to show my support for the bill as I believe whaling should be banned in Iceland. I've witnessed the brutality of whaling in the Faroe Islands and know that it is impossible to maintain animal welfare whilst killing whales. I have studied the importance of whales in the marine environment and know that without them the nutrient balance will be disrupted and subsequently have impacts on the whole marine ecosystem.

Please consider the voices of those of us who oppose whaling in Iceland as I believe you won't be on the right side of history if you do not!

Kind regards  
Kai Grundy
