

Hello, my name is Gary Scholes and the date today is 20th October 2023 I believe you are looking at creating an anti whaling bill, if I may just say that all creatures deserve our protection especially cetaceans who have similar feelings to human, they can feel pain and suffering as we do, yet Hvalur appear to use inhuman methods to kill them, taking up to 1 hr for them to die, also the female caught and killed by them have their unborn babies cut from their stomach. Your country could have a thriving business with whale watching for several companies. Please support this bill and save Icelandic whales from further suffering..

Gary Scholes.
