

Hello.

Please end whaling in Iceland.

The vast majority of people in Iceland don't want whaling and it is not part of the people's cultural heritage. The sadness and feeling of hopelessness must be overwhelming for the Icelandic people. The economic and environmental impact of whaling is huge, especially in regards to the oceans as they are an integral part of cleaning the air as they take carbon dioxide from our environment. The damage that has been done by this senseless act of killing our beautiful whales can not be undone.

Where I live in British Columbia Canada our whales are revered, studied and treated as royalty. Every whale is known and accounted for. They are majestic and loved!

The world is watching. Please do the right thing and end this cruelty now.

Thank you from British Columbia, Canada. CA 🙏🙏🙏🙏🙏🙏🙏🙏
